Note:

1. Always check milk temperature before feeding the baby, to avoid burns. We recommend to heat milk positioning the dial in 40°C to avoid scalding.

2. The alternative of heating milk with the dial in 70°C, for the time that appears in the table, is a way to save time, because milk will reach a 40°C temperature quicker. However, it is very important that you do not exceed the time established in the table, otherwise milk temperature can exceed 40°C and could scald your baby.

3. For heating breastmilk, we recommend to use the dial in the 40°C position to avoid nutrient deterioration contained in breastmilk.

ASSURANCE

Pigeon Bottle & Babyfood Warmer Warranty

Thank you buying this Pigeon product; we hope you will be happy with it.

- ★ With this warranty, Pigeon guarantees the product to be free from defects in materials and workmanship for a period of 2 (TWO) years from the date of purchase by its first user. Repairs or replacement under the warranty will be provided to you without charge.
- ★ If still under the warranty period, prepare a description of the problem you have, and make sure that you have a proof of purchase document, such as an invoice or receipt. Contact your nearest Pigeon subsidiary or distributor to make arrangements.
- ★ The warranty does not apply to products used in the course of a business, trade or profession. The warranty does not cover any problems resulting from externally caused damage, use outside the product's specifications, faults caused by non-professional or non-approved repairs or from the use of non-Pigeon accessories and AC adapters.

THE WARRANTY IS OFFERED AS AN ADDITIONAL BENEFIT TO YOUR STATUTORY RIGHTS AND DOES NOT AFFECT THESE RIGHTS IN ANY WAY.

Heating reference

		Temperature before heating: 5-6°C (From Fridge)	Temperature before heating: 20-21°C (Room Temp)
200ml	40°C	17 mins	11 mins
	70°C	6 mins	4 mins
300ml	40°C	22 mins	11 mins
	70°C	7 mins	4 mins
300ml	40°C	19 mins	11 mins
	70°C	5 mins	3 mins
Baby Food	70°C	22 mins	4 mins
		0°C (From Freezer)	5-6°C (From Fridge)
Breastmilk Bag	40°C	25 mins	7 mins
	70°C	9 mins	2 mins

NOTE: For warming of Breastmilk, we strongly recommend the usage of 40°C temperature to avoid any detioration of nutritients found in breastmilk during warming.

Calentador eléctrico de biberones y comida

User Manual

- For all sizes of feeding bottles
- Keeps desire temperature for longer time
- Includes a heating cup for babyfood
- Instant Heating
- Easy to use

Dedicated to the Benefits of Breastmilk

Advantages over Microwave

The Pigeon bottle warmer is suitable for all shapes and sizes of feeding bottles. Instantly heats according to desire temperature, in an uniformed manner, without destroying the nutrients, in contrast to microwave oven.

Major Parts	Material
Heating Cup	Polypropylene (Heat Resistance: 120°C)
Cover	Polypropylene (Heat Resistance: 120°C)
Warmer	Polypropylene (Heat Resistance: 120°C)
Hot Plate	Aluminium

Specifications:

Power Input	AC 110V 50-60Hz
Rated Temperature	260 ± 10°C
Heater	PTC Porcelain Heating Plate
Temperature Range	35°C - 100°C (± 5°C)
Capacity	Warmer : 250ml
	Heating Cup : 125ml

Directions for use

Before use, add 110ml of clean water.

Place milk bottle into heating compartment. Top up water until water level is about 1cm. away from brim before switching on.

For warming of milk, turn knob to 40°C

For warming of food, place food into heating cup provided and turn knob to 70°C mark.

Points to note

1. Always add water first before plugging in the plug.
2. Keep away from children to prevent scalding during operation.
3. Ensure water level is at the water level mark (inside heating compartment) Before Turning on the power switch.
4. Switch off warmer & pull out plug after each use.
5. After every use, pour away unused water & wipe dry.
6. Prolonged heating of milk / food will deteriorate its nutrients.
7. During washing, Do Not immerse the whole unit into water.
8. Always test the heated milk/food before feeding the baby to avoid scalding.
9. Do not attempt to open or repair the warmer by yourself. Please consult our Service personnel.
10. For preparation of Formula, please follow manufacturer instructions.

Features

In order for baby to enjoy milk at suitable temperature and to provide mother a simple solution to the task of warming milk/food, Pigeon´s Bottle & Babyfood Warmer has the following special features:
